

## COMEDIC HYPNOTIST TERRANCE B – Suggested Stage Plot and Setup

Sound Booth min 50ft  
in front off stage

AUDIENCE

### General Requirements

#### **Stage**

- Chairs **without arm rests** should be arranged in a straight line. If space permits, leave room behind the chairs to be able to move around. Otherwise please set them against the back wall.
- Side table should have 6 bottled water.
- Suggested minimum stage size is 20' deep x 30' wide– the bigger the better (this way it can accommodate more volunteers).

#### **Lighting**

- Soft front wash. No Effects. Blue and white gels
- No follow spot required, unless the venue warrants it.

#### **Sound**

- Playback sound monitors (speakers for the performer on stage) should be used wherever possible to assure crisp and clear sound for the participants.
- Two microphone (cordless) - One microphone stand.
- One corded mike at sound booth. The Sound Booth should be in front of the stage to the left or right to allow sound tech to video tape the show (min 50ft away).
- System input required. Please provide one of the following - DI box (direct input box) or XLR or ¼" input.
